

BoilerMag^{XC}

Dual Flow System Filter

THE COMPACT FILTER WITH DUAL FLOW TECHNOLOGY

- Protects heating systems from black iron oxide
- Extra-compact design, ideal for restricted spaces
- Dual Flow action maximises collection, minimises size
- Simple “in-line” installation
- Supplied with traditional isolation valves
- Can be installed on horizontal or vertical pipework
- Non-block magnetic configuration
- The cost-effective choice for domestic properties
- A requirement of BS7593:2019

BoilerMagXC packs performance into a small space.

It's patented Dual Flow design means system water is exposed to the magnet twice on a single pass. This means the size of the extraction chamber is minimised resulting in better filtration performance.

It features a simple “in-line” installation and includes high-quality isolation valves.

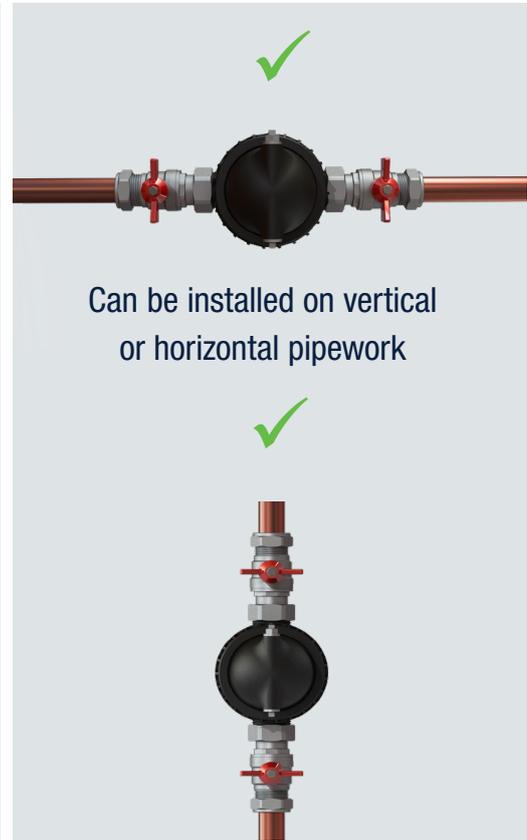

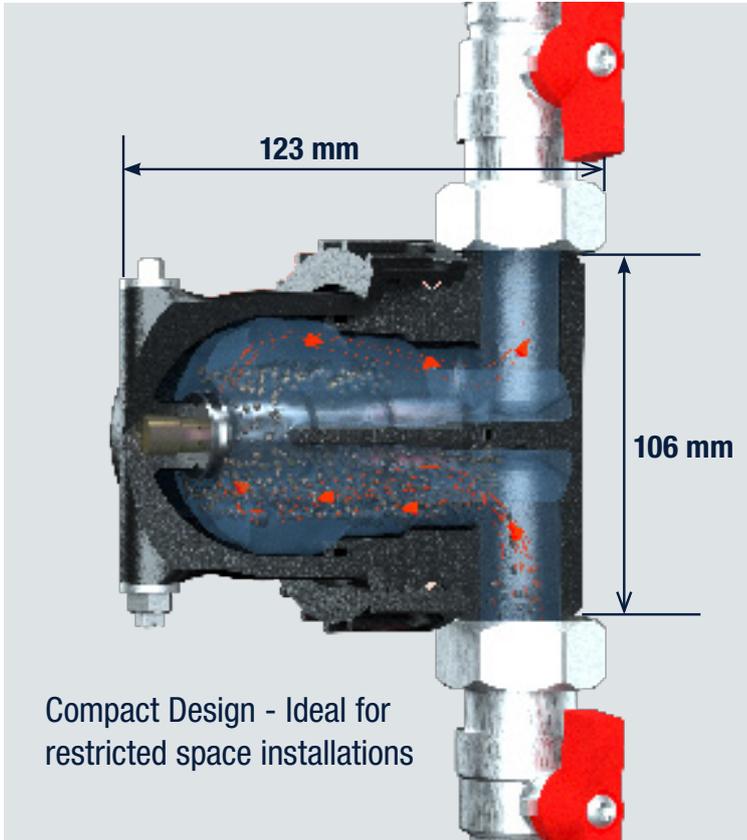

Cleaning can be done quickly and easily by simply removing the magnet sleeve and rinsing.

IDEAL FOR RESTRICTED SPACE INSTALLATIONS

Patented Dual Flow Technology

System water is exposed to the magnet twice on a single pass improving filtration

BoilerMagXC has been designed for durability and ease of installation & servicing
